

Compiling software on OpenIndiana

Work in progress -- please pardon the point-form notes to start.

- different development environments:
 - ss-dev
 - gcc-dev
 - which to use for what
- installing development environments
 - via IPS
 - via download from Oracle (currently doesn't work)
- changing between development environments
 - path re-ordering
- configuring builds
 - with GNU autotools
 - CFLAGS and LDFLAGS
 - common questions
- building the software
 - make vs. gmake
 - alternative make tool support
- packaging and other system adaptations
 - primer on creating IPS packages
 - primer on creating SVR4 packages
 - integration with SMF
