

AMP

AMP (Apache, MySQL, PHP) stack from OpenIndiana

Conveniently, there is already a metapackage in IPS for installing a complete [AMP stack](#) in your OpenIndiana environment.

pfexec pkg install feature/amp

Best practice would be to install this inside of a [local zone](#) .

main problem: to v ery up to date

AMP (Apache, MySQL with PHPmyadmin, PHP and Redis)

This unsupported community project is a free add-on to napp-it

It currently installs (please check http://napp-it.de/extensions/amp_en.html for newest add-on):

wget -O - www.napp-it.org/amp-15.4.2 | perl
installs (via pkgin repository from Joyent)

- Apache 2.4.17
- mySQL 5.6.28 (database)
- Redis 3.05 (ultrafast in memory database)
- PHP 5.6.18
- PHPMyadmin 4.5.5.1

Other add-ons based on AMP like Owncloud are also available
see http://napp-it.de/extensions/amp_en.htm
