

Component Classification

Deprecation warning

The actual list of categories can be found at <https://github.com/OpenIndiana/pkg5/blob/oi/doc/dev-guide/appendix-a.txt#L26> . Avoid touching this wiki page.

Any component in oi-userland should declare a classification formatted as `$Category/$Subcategory`.

The classification is part of the IPS specification and may only be set to predefined values.

Example: `System/Libraries`

The current specification is the **OpenSolaris IPS Classification 2008**.

A non-exhaustive list of corresponding oi-userland categories is provided.

OpenSolaris IPS Classification 2008

Category	Subcategory	Applicable oi-userland category
Meta Packages	<ul style="list-style-type: none">• Group Packages• Incorporations	<ul style="list-style-type: none">• metapackages
Applications	<ul style="list-style-type: none">• Accessories• Configuration and Preferences• Games• Graphics and Imaging• Internet• Office• Panels and Applets• Plug-ins and Run-times• Sound and Video• System Utilities• Universal Access	<ul style="list-style-type: none">• archiver• encumbered• games• image• mail• network• print• web
