

# Popular Software

This is a list of popular freely-available open source server-related software available through Oracle's Userland-gate consolidation.

Consider it only as a guide for userland software currently being provided for the OpenIndiana distribution. If you have a bug or RFE for any of the software on this list then please review or create a 'New Issue' on [bugs.openindiana.org](http://bugs.openindiana.org) and assign to the 'OI-Userland' team for their review. Any OI distro-related user discussions are usually handled over in the [openindiana-discuss](mailto:openindiana-discuss) mailing list or openindiana IRC channel.

OI-IPS package repos:

- [pkg.openindiana.org/hipster](http://pkg.openindiana.org/hipster)
- [pkg.openindiana.org/hipster-encumbered](http://pkg.openindiana.org/hipster-encumbered)

External package repos:

- <http://sfe.opencsw.org> Blog with resources about spec-files-extra packaging projekt. It is maintained and uses an automatic build system. Hosting is kindly received from OpenCSW project, but contained packages are all **native** SFE packages not OpenCSW ones).  
To see the list of currently available packages: <http://sfe.opencsw.org/localhostoih> and see the repository with even more build recipes: <https://svn.code.sf.net/p/pkgbuild/code/spec-files-extra/trunk/> (see subdir encumbered and experimental as well). Please ask for a new package to be compiled / added on [sfepackages at g mail dot com](mailto:sfepackages@gmail.com) or on the blog.

OI-IPS package repos: (Currently not maintained, but may contain still valuable software. Volunteers are very welcome! You can get training on how to build/update/maintain those packages. Ask for tomww on irc channel #oi-dev)

- [pkg.openindiana.org/sfe](http://pkg.openindiana.org/sfe)
- [pkg.openindiana.org/sfe-encumbered](http://pkg.openindiana.org/sfe-encumbered)

Page Maintainer: Ken Mays

Below: List of packages on [pkg.openindiana.org](http://pkg.openindiana.org) (check this?)
